Quick-Start Guide

Multipurpose Sensor

Meet your Multipurpose Sensor

The most versatile device in the Samsung SmartThings™ family, the Multipurpose Sensor acts as an open/closed, vibration, orientation, and temperature sensor all in one.

How to connect a Multipurpose Sensor

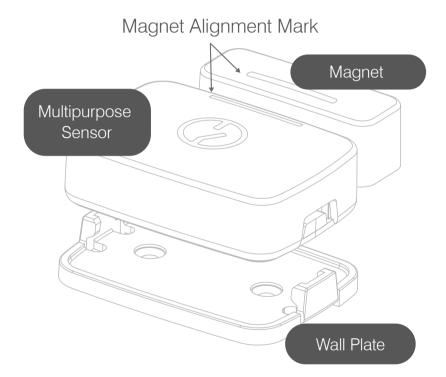

Select "Connect New Device" in the free SmartThings mobile app and then remove the "Remove to Pair" tab found in the Multipurpose Sensor.

Installation Tips

The Multipurpose Sensor works best if it's within 15 feet (4.5 meters) of the SmartThings Hub when you connect it.

If your device doesn't connect

If your device doesn't connect after removing the "Remove to Pair" tab, hold the "Connect" button while inserting the battery. Release the button when the LED is lit. The LED will blink blue while attempting to connect. Then select "Connect New Device" in the SmartThings app.

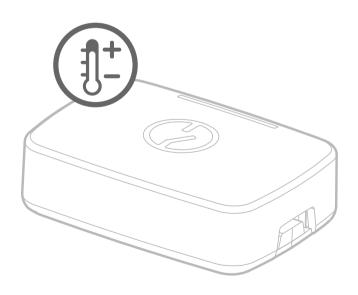

Use your Multipurpose Sensor to know if doors are open or closed

The SmartThings Multi Sensor can monitor whether doors, windows, cabinets or your garage are open, closed or have been left open after you leave home. To start, mount one part of your Multipurpose Sensor on a doorframe, window frame, or the fixed part of a cabinet or drawer, and place the other part next to it on the door, window, or part that opens.

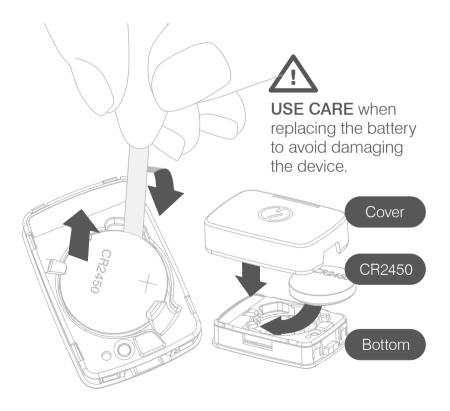

Use your Multipurpose Sensor to monitor temperature

The Multipurpose Sensor can detect the temperature in the room where it's located. By placing the Multipurpose Sensor on a door, window, or cabinet, you can monitor the temperature and receive alerts if the room gets too hot or cold.

Replacing the battery

To replace the battery in your Multipurpose Sensor, use a flat tool to carefully remove the battery from the device. Then add a new battery and close the cover back into place.
