

Secure Watches & Jewelry in High-Capacity, High-Security and Fireproof BlumSafe Professional Wall Safe

Archdale NC (January 30, 2024) Safeguard watches and other valuables in the [BlumSafe Professional](#), the latest addition to BlumSafe's line of Made in America, customizable built-in safes for mounting in walls and cabinetry.

With higher capacity and security features than the original BlumSafe, this Class B burglary safe offers optional fire protection and premium features found in more expensive safes. The built-in BlumSafe Professional, which is available in custom colors, can be configured to house up to 18 watches with the BOXY® Brick modular winder system, up to 8 jewelry drawers or a combination of winders, drawers and shelves. In addition, every safe includes a base drawer which can hold an additional four watches and provides power for the winders above. The interior door panel can be easily customized to include modular velvet or mirror-covered panels and utility grids, providing an opportunity to store necklaces, guns, important documents and other valuables. As a customer's collection grows or storage requirements changes over time, the modular configuration of the inside of the safe can adapt to these new requirements.

Weighing 2-4 times more than an RSC-class safe, the BlumSafe Professional features a heavy, pry-resistant ½" solid steel door and ¼" solid steel walls on all five sides. Without the fireproofing option, the safe weighs in at approximately 290 pounds, and over 450 pounds with fire protection. More steel equals more protection.

The BlumSafe Professional's innovative design includes numerous anti-penetration features like a dead bar/continuous channel that locks the door into the safe body when shut and multiple relocking mechanisms. The slip clutch in the handle protects the entire lock mechanism from attacks, while the cam-over-center direct-drive lock mechanism boasts metal bearings at every moving point. Two lock choices are offered - a UL listed Type 1 S&G Titan direct-drive electronic keypad for rapid access or a UL listed group II dial lock for battery-less mechanical dependability. Prices start at \$4,599.99 USD.

"The BlumSafe Professional is the big brother of our very successful BlumSafe," explained Founder & CEO Rob Blum. "Many of our customers wanted a higher capacity watch safe that could hold up to 18 winders, instead of the 12 in the regular BlumSafe. They also wanted higher security and fireproofing against all risks, but still have the

'built-in' form factor that doesn't take up floor space and is still relatively reasonably priced to all competition."

BlumSafe Professional wall safes can be ordered in standard black or a variety of custom colors. Wood veneer cladding or custom finishes are available for the interior. This one-of-a-kind safe can be placed in a bedroom or dressing room, either mounted between 16" on-center studs or within a closet or cabinet. BlumSafe's practical and reasonably-priced timepiece and jewelry storage options include [wall-mounted safes](#) and other unique [concealment solutions](#) each with a myriad of customization options and accessories that will appeal to devoted horologists and jewelry collectors alike. About BlumSafe:

BlumSafe was born from a passion for watches and an unwavering commitment to create accessible, secure watch storage solutions for discerning collectors, as well as for customers seeking to protect or showcase all types of other valuables. Founder Rob Blum sought to keep his watch collection secure from household visitors and thieves while also allowing easy access to swap out watches daily -- at a reasonable price. Blum's initial solution was a deep wall-mounted safe with watch winders, offered at a fraction of the price of expensive freestanding watch safes. Since 2016, the product line has evolved to include a variety of tasteful and flexible options for watch collectors and others around the world. Customers can customize BlumSafe's Made in America products as their needs change, including safes with steel or transparent "display" polycarbonate doors, concealment cabinets and accessories to fit their personal style.
