

Protect & Admire Larger Collectibles With the New BlumSafe Secure Display Cabinet

Made in USA Quality & Design

Archdale NC (August 6, 2024) BlumSafe announces the launch of [Secure Display Cabinet](#), which offers a secure way to protect and view larger valuables like designer pocketbooks, collectible sneakers, trophies & medals, sports memorabilia, top shelf liquors, humidors, sports memorabilia, stamp and coin collections, very large watch collections, etc. The Display Cabinet features a tough, 3/8" thick polycarbonate window, the same material used in bulletproof windows, so collections can be enjoyed while keeping them safe from opportunistic hands.

A Smart Window option is offered where, with a smartphone or voice assistant command, the window can go from a clear to opaque view, to conceal valuables from prying eyes. The window also has UV-protection to reduce sun damage to collectibles.

The Cabinet is designed to either be freestanding or built into dressing room cabinetry or a closet. Standing 60" tall by 25" wide and 15" deep, the cabinet can be customized with shelving, accessories and lighting options.

For those wanting to secure firearms safely, a shelf with rifle racking is available. In addition, an optional heavy-duty pistol lock box can be attached to the cabinet floor to stow two pistols out of sight.

An advanced, patent-pending locking system runs the length of the door. The locking carriage locks every few inches along the door which helps thwart pry attacks. The next generation BlumSafe keypad allows opening via programmable code, fingerprint or an RFID card or key fob. The backlit keypad is touch sensitive and has a more powerful, advanced fingerprint sensor than prior generations.

The Cabinet is available in BlumSafe Black and White, but custom colors are also available. The BlumSafe Secure Display Cabinet starts at \$2,799 USD. A solid door version without the window panel and a UL-listed S&G keypad lock is also available.

The BlumSafe Secure Display Cabinet ships in 4 boxes featuring 6 panels. The heaviest panel is only 60 lbs. so it's easily assembled by one person. The Cabinet is manufactured in the US.

"The Secure Display Cabinet is perfect for housing collections of larger items that you want to enjoy and not hide away," explained BlumSafe Founder & CEO Rob Blum. "But you still don't want someone to walk away with the items you've carefully curated and procured."

BlumSafe's array of safe products is designed and manufactured in North Carolina and Minnesota for Made-in-USA quality and design, as well as enhanced sustainability. BlumSafe's safe solutions include built-in wall safes, secure display cabinets and concealment furniture.

BlumSafe's knowledgeable customer service team and white-glove fulfillment crew are based in North Carolina. Discerning customers across the globe trust BlumSafe's safe solutions.

The original BlumSafe was inspired by Founder Rob Blum's desire to find a perfect deep, built-in safe for mounting in walls, cabinets or closets for his watch collection. He wanted a product that provided concealment, accessibility, adaptability and security at a reasonable price. Blum realized there might be others who'd rather invest in expanding their collection than a more expensive safe without differentiating features. Although the original safes were designed for watches, watch winders and jewelry, people have found many uses for the unique safes and concealment furniture to secure other valuables and collections.

To secure and view smaller valuables, choose BlumSafe's clear, polycarbonate [Display Door BlumSafe](#). The built-in Display Door BlumSafe can be configured to house up to 12 watches on the completely modular BOXY® Brick modular winder system, up to 8 jewelry drawers or a combination of winders, drawers and shelves - and can follow you from home to home. As a customer's collection grows or storage requirements changes over time, the modular configuration of the inside of the safe can adapt to these new requirements. Every safe includes a base drawer. A biometric fingerprint/keypad lock system (with a backup key) helps make your valuables easily accessible and secure. BlumSafes are mounted between wall studs or housed within cabinets or in closets (26 3/4" tall by 14.14" wide and 7 3/8" deep), and are stocked in black and white with custom colors also available. The Display Door BlumSafe starts at \$1,898 USD.

Another BlumSafe product offers security and visibility to stored items. The patent-pending [BlumSafe Concealment Cabinet](#) features a BlumSafe hidden within a cabinet that can be summoned by remote control, smartphone app or by voice control like Alexa. The BlumSafe quietly lifts up and out of the cabinet top to reveal up to 12 watches on their winders and provide easy access to select the desired watch for the day's activities. While initially designed for watch collectors, the Concealment cabinet can also store jewelry, top shelf liquor or other collectibles. No intruder will ever suspect this cabinet protects valuables in a safe -- and its reasonably priced.

The BlumSafe Concealment Cabinet is an excellent choice for those collectors who can't or don't want to install a wall-mounted BlumSafe or want a quick, ready-to-use solution. The Concealment Cabinet comes fully assembled with the pre-mounted BlumSafe for a speedy 10-minute setup. Manufactured in North Carolina by commercial cabinet makers, this high-quality piece of furniture features a reliable, durable, quiet lift mechanism like those used in television lifts. The BlumSafe Concealment Cabinet, including a BlumSafe, starts at \$4,599 USD.

BlumSafe's practical and reasonably-priced timepiece storage options include [wall-mounted safes](#) and unique [concealment solutions](#) with a myriad of customization options and accessories that will appeal to devoted horologists and collectors alike. About BlumSafe:

BlumSafe was born from a passion for watches and an unwavering commitment to create accessible, secure watch storage solutions for discerning collectors, as well as for customers seeking to protect or showcase all types of other valuables. Founder Rob Blum sought to keep his watch collection secure from household visitors and thieves while also allowing easy access to swap out watches daily -- at a reasonable price. Blum's initial solution was a deep wall-mounted safe with watch winders, offered at a fraction of the price of expensive freestanding watch safes. Since 2016, the product line has evolved to include a variety of tasteful and flexible options for watch collectors and others around the world. Customers can customize BlumSafe's Made in America products as their needs change, including safes with steel or transparent "display" polycarbonate doors, concealment cabinets and accessories to fit their personal style.
