

BlumSafe Introduces the New BlumSafe Professional Junior *Made in USA Wall Safe with Enhanced Security*

Archdale NC (September 10, 2024) [BlumSafe](#) is launching another innovative safe to its growing line up of built-in wall safes manufactured in the United States – the [BlumSafe Professional Junior](#).

Building on the BlumSafe' Professional's success, the Professional Junior was designed to provide an upgrade to the regular steel door BlumSafe's security and capacity without too significant a price increase, while helping it meet California Department of Justice gun safe standards.

There are many reasons to choose the BlumSafe Professional Junior for securely storing jewelry and other valuables:

- 12-gauge steel walls
- Enhanced UL-listed lock and keypad with reliable fingerprint sensor
- Enhanced pry-resistance with locking jaws and anti-drill lock plate
- Increased storage capacity – base drawer, 12 watch winders and a jewelry top drawer
- Made in USA quality, jobs and sustainability

Safeguard watches and other valuables in the [BlumSafe Professional Junior](#), the latest addition to BlumSafe's line of Made in America, customizable built-in safes for mounting in walls and cabinetry.

This heavy-duty safe features a heavy, pry-resistant 1/2" solid steel door and 12-gauge steel walls on all five sides.

The Securam Scanlogic keypad and fingerprint sensor is a UL-listed lock. The RF Sensor is fast and reliable. The 9-volt battery on this keypad is conveniently accessed from the safe exterior.

Pry-resistance is key to any safe's protective value. The BlumSafe Professional Junior is engineered with a patent-pending design featuring three jaws running from along the safe door. The jaws descend into openings in the frame when the door is closed and clamps the door shut. Two hardened (Rc 60+) anti-drill steel plates are combined with a

200-ball bearing plate that is designed to chew up drill bits and slow down drilling penetration of the lock.

This innovative design allows for increased capacity versus the BlumSafe. The BlumSafe Professional Junior accommodates a base drawer, 12 watch winders and one jewelry top drawer or any combination of winders, drawers or the two included shelves – up to that capacity.

The BlumSafe Professional Junior is American made. Our customers value its high-quality construction, helping the US economy by keeping jobs in the United States and contributing to sustainability by reducing the environmental costs of international shipping.

Pricing and capacity-wise, the Professional Junior is positioned between the identically sized BlumSafe and the larger, heavier and fireproof BlumSafe Professional. A re-engineered door allows for an extra Jewelry Drawer. Existing BlumSafe customers can upgrade to this BlumSafe Professional Junior with ease because the size and mounting hole pattern is the same. Concealment accessories like the Electronic Screen and Mirror are also compatible.

“We continue to expand our BlumSafe line to give our customers choices that fit their needs,” explained Founder & CEO Rob Blum. “The BlumSafe Professional Junior’s design and components make it a smart choice for someone’s first safe or when expanding collections make a second safe a necessity. This will pair nicely with an original BlumSafe.”

BlumSafe Professional Junior wall safes can be ordered in standard black or a variety of custom colors. Wood veneer cladding or custom finishes are available for the interior. This highly functional safe can be placed in a bedroom or dressing room, either mounted between 16” on-center studs or within a closet or cabinet. Retail starts at \$2,499 USD.

BlumSafe’s practical and reasonably-priced timepiece and jewelry storage options include wall-mounted safes and other unique concealment solutions each with a myriad of customization options and accessories that will appeal to devoted horologists and jewelry collectors alike. About BlumSafe:

BlumSafe was born from a passion for watches and an unwavering commitment to create accessible, secure watch storage solutions for discerning collectors, as well as for customers seeking to protect or showcase all types of other valuables. Founder Rob Blum sought to keep his watch collection secure from household visitors and thieves while also allowing easy access to swap out watches daily -- at a reasonable price. Blum’s initial solution was a deep wall-mounted safe with watch winders, offered at a fraction of the price of expensive freestanding watch safes. Since 2016, the product line

has evolved to include a variety of tasteful and flexible options for watch collectors and others around the world. Customers can customize BlumSafe's Made in America products as their needs change, including safes with steel or transparent "display" polycarbonate doors, concealment cabinets and accessories to fit their personal style.
